

SAAM – Operational Data 2022

Santiago, February 16, 2022

SMSAAM (SSE; SMSAAM) reports on operating volumes for January 2022 by business division

Towage Division

- In January, maneuvers increased 24% over January 2021, mainly due to consolidating the Intertug operations as of February 2021. Isolating that effect, volumes were up 7% for the month due to more vessel berthings stemming from import and export growth.

Port Terminals Division

- Consolidated terminals saw an 11% rise in volumes transferred due primarily to a larger number of ships served at foreign terminals because of congestion at numerous terminals during the prior month.
- Volumes at associate terminals fell 2% in January versus 2021, mainly because of fewer ships from Asia and vessel delays in northern and central Chile.
