

Occupational Health and Safety Policy

Occupational Health and Safety Policy

The mission of SAAM is to provide port services, assistance in maneuvering, maritime operations and comprehensive logistical services, generating excellence in operational solutions, thereby creating value for its customers, employees and shareholders, with due respect for the community and the environment.

At SAAM we declare safety to be an essential value that should be present in all our operations through ongoing compliance with the following principles:

- 1. We acknowledge** respect for the life and protection of the people who form part of the SAAM team as the foundation of our culture of safety.
- 2. We prevent** workplace injuries and illnesses by implementing adequate risk control measures in all operations by identifying and evaluating hazards and establishing, implementing and maintaining measures specifically aimed at preventing serious and fatal incidents.
- 3. We comply** with legal requirements and other standards that the organization subscribes to directly or through its customers, guaranteeing strict compliance from employees, contractors and suppliers.
- 4. We encourage** active participation in safety issues by all employees of SAAM and its service providers, and in self-care and mutual care. Likewise, we promote leadership in the management of our culture of safety.
- 5. We persevere** in organizational efforts to continually improve the performance of our SAAM Occupational Health and Safety Management System, encouraging learning opportunities, constructive criticism and implementation of improvements.

The executive management team of SAAM and representatives of all its subsidiaries are committed to assigning the necessary resources for proper implementation and compliance with these principles.
