

Environmental **Policy**

We recognize that a company's success is linked to its commitment to operate while contributing to a more sustainable future for the next generations, caring for and respecting natural resources and the environment, managing risks and minimizing environmental impacts.

Through this Policy, we seek to establish environmental stewardship as a cornerstone of our employees' conduct and all key business development processes, at the operational level, in new acquisitions and for due diligence in environmental matters, in line with the industry's main international benchmarks in environmental management.

Our commitments in this Policy are achieved by implementing, monitoring and controlling concrete sustainable actions aligned with our mission and sustainability strategy, namely:

Developing a culture of care and respect for the environment and communities, encouraging employee training and leadership, involving our main stakeholders (i.e. suppliers, contractors and other parties that are key for business development) in this challenge.

Implementing a management system that promotes the continuous improvement of our environmental performance, setting annual targets and goals that help us reduce our environmental impacts.

Promoting innovation, investment and financial monitoring for adopting new technologies that contribute to the protection of biodiversity, increased energy efficiency and active management of our environmental impacts, reinforcing our commitment to climate change.

Ensuring efficient and responsible management of resources at all our operations, monitored through internal and external audits, to reduce and manage our waste and atmospheric emissions and prevent all forms of pollution.

The executive management teams of SAAM and its subsidiaries are committed to allocating the necessary resources for proper implementation and compliance with this Policy. In addition, we guarantee compliance with the legal requirements in each country where we operate and all other standards adopted voluntarily or agreed upon with our key stakeholders.
