

Environmental Policy

We recognize that a company's success is linked to its commitment to operate while contributing to a more sustainable future for the next generations, caring for and respecting natural resources and the environment, managing risks and minimizing environmental impacts.

Through this Policy, we aim to position environmental stewardship as a core pillar of our employees' conduct and all key business development processes, including both operational activities and new acquisitions, in alignment with leading international environmental management standards for our industry.

Our commitments in this Policy are achieved by implementing, monitoring and controlling concrete sustainable actions aligned with our mission and sustainability strategy, namely

Developing a culture of care and respect for the environment and communities, encouraging employee training and leadership and involving our main stakeholders in this challenge.

Implementing a management system that promotes the continuous improvement of our environmental performance, setting annual targets and goals that help us reduce our environmental impacts.

Promoting innovation and investment in the adoption of new technologies that contribute to biodiversity protection, energy efficiency, and strengthen our commitment to addressing the impacts of climate change.

Ensuring efficient and responsible resource management throughout our operations by monitoring performance through internal and external audits, reducing and properly managing waste generation and atmospheric emissions, thereby mitigating environmental impacts.

Integrate practices into our operations that promote the protection of biodiversity.

The executive management teams of SAAM and its subsidiaries are committed to allocating the necessary resources for proper implementation and compliance with this Policy. In addition, we guarantee compliance with the legal requirements in each country where we operate and all other standards adopted voluntarily or agreed upon with our key stakeholders.

Hernán Gómez Cisternas
Chief Executive Officer
